

Dear Hiring Manager,

Application for the Position of Senior Software Engineer

It is with great enthusiasm that I submit my application for the position of Senior Software Engineer, through my 7-year career, I've come to specialize in developing, testing and supporting scalable and reusable enterprise web application for ERP and FinTech domains. I particularly excel in actively participate in grooming meetings, technical investigation/ designing and implementing the software features and writing test automation.

Presently, I am a Senior Software Engineer at LSEG Technology (www.lseg.com). I am working for a department called "Post Trade" where our team responsible for creating features for businesses which involve multiple instruments such as "Future", "Fixed Income", "Equity", "Options" and "Derivative" staging from creating trades, creating allocations, creating positions, netting them and instruct them via outbound to government authorities using XMLs. I am working as a developer using Vaadin framework which involves Java, J2EE, Spring Boot, Yaan, Cypress and several other open-source technologies. My team consist of 7 Developers, 1 Business Analysts and 1 Quality Analysts. As a developer, it is our responsibility to contribute on internal grooming, technical investigation, design, implement the story and to write end to end automation scripts followed by create release packages. Also supporting other developers, performing code reviews, set up design review meetings are part of the job.

Formerly, I was a Software Engineer at IFS R&D International Pvt Ltd (www.ifs.com), where I was contributing end-to-end software development life cycle for 2 projects (Hungarian and Brazilian markets), used by over 10k clients. Amongst my various achievements during my tenure, I am most proud of driving the test-automation for 1 core project that is to be enhanced the quality aspects of the product and use by >1000 end users, contributing to a significant percentage of IFS's monthly revenue stream. I oversaw the entire software development life cycle of both projects, from requirements gathering to final rollout. The technologies used .NET, PL/SQL, Oracle, git etc.

I worked as a research intern at WSO2 (www.wso2.com) and contributed to the WSO2 Machine Learner product, I was mainly involved in adding "time series algorithm" to the product. I had the opportunity to explore various machine learning models and algorithms during the stay there.

My extensive background and knowledge in Java product development will allow me to effectively drive the development of secure and scalable projects that are built with high quality code. As such I will play a vital role in enhancing system performance and streamlining operational efficiency. I believe, my involvement in Agile software development over the years will help to effectively contribute to the project deliveries with team work.

I am thrilled at the possibility of being part of such a renowned firm and would love the opportunity to meet with you and discuss the value that I can bring to this company. I appreciate your time and consideration, and I look forward to hearing from you. Please feel free to contact me at any time via mobile (WhatsApp) at +94 77045 8636 or by email at firmas.aleem23@gmail.com.

Yours sincerely,
Firnas Aleem

EXECUTIVE SUMMARY

- Accomplished Software Engineer with > 7 years' industrial experience in designing, developing, testing and maintaining enterprise software solutions for customers around the world on ERP (Supply Chain and Finance) and Fin Tech domain areas and also proficient in overseeing end-to-end delivery of software development lifecycle.
- Gained professional working experience as an Engineer from multi-national reputed companies and working with Tech Leads and Architects.
- Collaborating with small teams by completing user stories assigned to each sprint and being an active developer from story refinement to scripting test automation to packaging and delivery.
- Participating and contributing ideas on future road map discussions of new technology adaptation for legacy systems used in the company.

Significant Highlights

- Worked on a leading ERP product's developments where it supports more than 10000 customers worldwide
- Worked for one of the reputed open source technology providers which offer an enterprise platform for integrating application programming interfaces, applications, web services locally and across the internet.
- Working on FinTech stock exchange market products for UK and other Western countries.

TECHNICAL SKILLS

Programming Languages	Java 11+, PL/SQL, C#, JavaScript, Python
Web Applications	HTML 5+, CSS 3, Vaadin 7.7.36+ Java Front End
Database Software	Oracle 12c, MySQL, NoSQL
Version Control	Git, SVN, Bitbucket, Gitlab
Miscellaneous Tools	REST APIs, XML, Tomcat 8.5+, J2EE, Spring Boot, AWS, Cypress, Cucumber, Yaan, Maven, ehcache, SLF4J Loggers, Jira and Jenkins CI/CD

KEY SKILLS

- Technical Investigation • Software & Application Design • Customer Focused
- Self-Driven • Ownership • Continuous Learning • Sprint & Agile Methodology • Code reviews • Cross-Functional Teams
- Debugging • E2E Automation

PROFESSIONAL EXPERIENCE

SENIOR SOFTWARE ENGINEER (3+ Years)

Dec 2021 – Present

London Stock Exchange Group Technology (LSEG Technology)

- Direct cross-functional teams comprised of 9 professionals to oversee automated front-end testing lifecycle of a project for global customers in UK for the London Stock Exchange post trade market. Individual contributor in resolving complex front-end technical issues.
- Technical investigation of customer requirements, plan and break down user stories and develop functionalities. Drive continuous integration and delivery of projects by collaborating with team members during sprint cycles, conducting automation testing and implementing iterative changes.
- Taking care of product and solutions releases and product upgrades on each sprint. Also supporting QA life cycle by managing fixes for bugs.

SOFTWARE (SENIOR) ENGINEER (4 Years)
IFS R&D International Private Limited

Dec 2017 – Dec 2021
