Software Engineer : Java

ABOUT ME

A passionate Software Engineer with experience in backend development using Java, Node.js, and modern frameworks. Strong expertise in developing scalable, high-performance applications following industry best practices. Proactive, analytical, and eager to learn new technologies to contribute effectively to innovative projects.

WORK EXPERIENCE

Aug 2024 - Jan 2025

Software Engineer Intern

- Designed and optimized backend services using Node.js, Fastify, and Prisma, improving API efficiency and database performance.
- Developed and maintained a scalable Flutter application with an intuitive user interface, enhancing user experience.
- Collaborated in a DevOps role, managing CI/CD pipelines and cloud deployment strategies.

EDUCATION

2021 - Present

BSc (Hons) Computing and Information Systems

- Sabaragamuwa University of Sri Lanka

PROJECTS

- RedHope System for Blood Donation - Flutter, Node.js, WSL2
- Job App - React, Spring Boot, PostgreSQL (CRUD operations, REST APIs)
- E-Commerce Web Application (Ongoing) - Spring Boot, Spring Security, JWT, JPA

SKILLS

- Programming Languages: Java, JavaScript, Node.js, HTML, CSS, Flutter
- Frameworks & Technologies: Spring Boot, Fastify, Prisma (ORM)
- Databases: MySQL, PostgreSQL, MongoDB
- Development Tools: Git, Swagger, Postman, ClickUp
- Concepts: Object-Oriented Programming (OOP), API development, CI/CD, DevOps

CERTIFICATIONS

- | | |
|--|----------------------|
| • Java Spring Framework 6 with Spring Boot 3 | Udemy, 2024 |
| • RESTful Services Fundamentals | Alison, 2024 |
| • AWS Certifications (Beginner Level) | Great Learning, 2024 |
