PROFESSIONAL SUMMARY

Dynamic and results-oriented Java Developer with over **8 years of experience** in designing, developing, and deploying enterprise-level applications.

Proficient in a variety of technologies including Java, ReactJS, Spring Boot, Spring Batch and Microservices, with a strong focus on delivering high-quality software solutions in agile environments.

Proven ability to handle time-critical tasks, enhance system performance through innovative coding practices, and design patterns.

CORE COMPETENCIES

Programming Languages: Java (8/11/17), JavaScript, TypeScript

Frameworks: Spring Boot, Spring Batch, Spring Security, Redis, Hibernate, ReactJS, Thymeleaf, Kafka

Cloud Services and Servers: AWS, Tomcat, Jboss

Architectures: Microservices, Monolithic, SOA

Web Technologies: HTML5, CSS, Bootstrap, jQuery

Databases: Oracle, MSSQL, PostgreSQL, MongoDB

Testing Frameworks: JUnit, Mockito, JMeter

Development Tools: IntelliJ IDEA, Eclipse, Docker, Kubernetes

Version Control & CI/CD: Git, Jenkins, bitbucket

Project Management Tools: JIRA, Redmine

Techniques and principles: Multithreading and Concurrency Handling, CAP Theorem, ACID properties, SOLID principles, TDD

PROFESSIONAL EXPERIENCE

Senior Java Developer (Central Provident Fund Board, Novena, Singapore)

October 2022 – October 2024

Technologies and Environments: Java 8/17, Spring Boot, Spring Batch, MS SQL, junit, Jmeter, Eclipse, jBoss, Microservices, Git, Jenkins

- Migrate of 300 million transaction records from a mainframe system to MS SQL (Using Spring Batch), enhancing data accessibility and reliability.
- Designed and implemented a Record of Payment (ROP) batch-processing module, successfully generating 60,000 records daily and ensuring seamless integration with third-party systems.
- Utilize Java multithreading and concurrency management techniques to enhance the speed and efficiency of the data read/write process, speed up to 170 times.
- Developed robust APIs for internal services, achieving 90% code coverage through comprehensive unit testing.
- Collaborated with clients to derive requirements and deliver features that align with business objectives.

- Participate in agile development processes, including sprint planning, task prioritization, and regular stand-ups to discuss project progress.
- Supervised a team of 3 members, coordinating project tasks, assigning responsibilities, and fostering effective communication to ensure timely delivery of project milestones.

Consultant – Technology (Virtusa, Colombo, Sri Lanka)

January 2022 - October 2022

Technologies and Environments: Java 8, Spring Boot, ReactJS, PostgreSQL, junit, IntelliJ IDEA, JBoss, Micro services, Git, Jenkins, JIRA, HTML5, CSS, Bootstrap, Docker, Kubernetes

- Completed the development of a front-end module using ReactJS, significantly improving user experience and system reliability.
- Designed and developed a microservice module in alignment with business specifications.
- Collaborated with clients to derive requirements and deliver features that align with business objectives.
- Analyze client needs and translate them into technical specifications, ensuring that the developed solutions align with business objectives.
- Managed a team of 5 members, overseeing project tasks, delegating responsibilities, and ensuring effective communication within the team to meet project deadlines.

Senior Software Engineer (Interinvest Software Technologies, Colombo, Sri Lanka)

November 2018 - January 2022

- Lead a team of junior developers, providing mentorship and guidance in software development best practices.
- Developed high-quality applications for travel insurance and CRM solutions, contributing to enhanced customer satisfaction.
- Provided production support according to the roster, ensuring system reliability and addressing issues promptly as they arose
- Converted existing SOA architecture modules into microservices to deploy in AWS, enhancing scalability and deployment efficiency.
- Managed and modified the CI/CD pipeline using Jenkins, ensuring that QA, UAT, and production environments were operational; promptly rectified any issues that occurred.

Software Engineer (Dialog Axiata, Colombo, Sri Lanka)

April 2018 - November 2018

- Designed and developed features for the OneCRM application, streamlining customer care operations and improving service delivery.

Associate Software Engineer (Virtusa, Colombo, Sri Lanka)

February 2017 - March 2018

- Worked on the Veracode application security platform, focusing on bug fixes and enhancements to improve overall product security.
- Participate in agile development processes, including sprint planning, task prioritization, and regular stand-ups to discuss project progress.

Trainee Software Engineer (Cosmoforge Technologies (Pvt) Ltd, Galle, Sri Lanka)

Jun 2016 – January 2017

- Collaborated with senior developers to create and maintain applications.
- Provided support for production environments by troubleshooting and resolving minor issues under the guidance of senior engineers.

ACADEMIC QUALIFICATIONS

- Master of Science in Computer Science - University of Sri Jayewardenepura, Sri Lanka. Jan 2021 – Sep 2022
- Bachelor of Information Technology - University of Colombo, Sri Lanka. Mar 2013 – Aug 2017

- National Diploma in Engineering Sciences (Electrical) - Institute of Engineering Technology Katunayake, Sri Lanka, 2013 – 2017

PROJECT HIGHLIGHTS

Central Provident Fund Board, Singapore: Developed a batch-processing module that improved data handling efficiency by 170 times compared to existing solutions.

New York Life Insurance Company: Contributed to the development of a platform for managing life insurance policies, enhancing operational efficiency for agents.

Staysure Travel Insurance: Developed a public web application that allows users to purchase travel insurance policies, integrating complex functionalities like pricing based on health conditions.

ADDITIONAL INFORMATION

Notice Period : immediate
Nationality : Sri Lankan
Date of Birth : 03 April 1990
Gender : Male
