

OSHANI KUMARATHUNGA

Software Engineer

oshanikumarathunga613@gmail.com | 077-5308155 | Colombo, Sri Lanka

LinkedIn: [Oshani-Kumarathunga](#) | GitHub: [OshaniKumarathunga](#)

PROFILE SUMMARY

An enthusiastic, highly motivated final year undergraduate with a strong drive to achieve goals through smart work. A responsible team player who can adapt quickly and stay focused on any productive targets, seeking opportunities in Software Engineering to apply and explore technologies for personal and professional growth.

SKILLS

- **Programming Languages:** Java, C, Python
- **Web Development:** HTML/CSS, JavaScript, TypeScript, Spring Boot, React, Angular
- **Database:** SQL, MySQL, PostgreSQL
- **Tools:** Android Studio, IntelliJ, VS Code, Jupiter Notebooks, Google Colab, Git, Bootstrap, Agile, Jira

EDUCATION

University of Moratuwa

BSc. (Hons) in Information Technology

Expected Graduation, July 2025

- **GPA:** 3.42 (Up to L4S1)
- **Related Coursework:** Data Structures & Algorithms, Object-Oriented Programming, Computer Organization & Architecture, Database Management Systems, Machine Learning, Artificial Intelligence, Calculus & Statistics

Ferguson High School, Rathnepura

G.C.E. Advanced Level in Biological Science Stream

2015-2019

- **Z - Score :** 1.5525
- **Results:** A - Chemistry , Biology and Physics - B

WORK EXPERIENCE

Software Engineer Intern

London Stock Exchange Group (LSEG)

Jan 2024 – July 2024

- Developed the LTS Dashboard using **React** and **TypeScript**, improving **front-end performance** by **30%** and reducing load time by **25%**.
- Implemented user role-based access control in the backend, enhancing security and reducing unauthorized access incidents.
- Built and optimized backend APIs with **Spring Boot** and **PostgreSQL**, improving data retrieval efficiency and database performance.
- **Technologies:** React, Java, Spring Boot, TypeScript, CSS, PostgreSQL, Redis (Basics).

RESEARCH EXPERIENCE

AI driven support system for Neurologists Integrating Neurological and Psychiatric Data

Sep 2024 – Ongoing

- Contributing to the depression detection module, focusing on identifying and analyzing datasets aligned with neurologists' findings.
- Researching Deep Learning techniques to detect depression through EEG analysis.

Research Interests: AI for mental health, DL, CNN, EEG analysis, emotion recognition.

PROJECTS

E-dowz | Health Care Management System

Team Member

[GitHub Link](#)

Aug 2022 - May 2023

- Developed the hospital profile management module to enable creation, update, delete and retrieval of hospital details and the functionalities of the hospital in the project.
- Implemented frontend and backend functionalities using **Angular, Java, Spring Boot**, and **MySQL**
- Integrated UI components with **Angular Material** and **Bootstrap**, enhancing user experience and increasing responsiveness by **80%**.

Heart Disease Predictor using Machine Learning

Individual Work

[GitHub Link](#)

Oct 2024 - Dec 2024

- Trained a machine learning model on the UCI dataset to predict heart attack risk, leveraging **Support Vector Machine, Decision Tree, Random Forests**, and **Linear Regression** for accurate predictions.
- Achieved an accuracy of 89.65%, optimizing feature selection and model hyperparameters for improved performance.

Task Management Application | Ongoing Project

Team Work

Oct 2024 - Ongoing

- Developing a task management system to organize and track tasks by integrating task operations, including adding, editing, deleting, and marking tasks as complete.
- Implementing full-stack functionalities using **React, Java, Spring Boot**, and **MySQL**, ensuring a responsive and scalable application.

API Testing with Cypress and Cucumber

Team Work

[GitHub Link](#)

Nov 2024 - Dec 2024

- Contributed to the testing of the frontend UI and backend API of a web application using **Cypress and Cucumber**.
- Ensured the reliability and functionality of the application through automated testing.
- Collaborated with the team to ensure high-quality test coverage for both the frontend and backend.

COMPETITIONS

HackMoral 5.0 | 2023 | Participant

Intra-faculty coding competition organized by INTECS Club, *University of Moratuwa*.

Mora UXplore 1.0 | 2023 | Round 2 Winner

UI/UX competition organized by the IEEE Student Branch, *University of Moratuwa*.

VOLUNTEER ACTIVITIES AND LEADERSHIP

Design Team Leader at "Sarasamu Yauwanaya"

LEO Club, University of Moratuwa

Aug 2021 - Dec 2021

Design Committee Member

IEEE Student Branch, University of Moratuwa

Jan 2023 - Jul 2023
