

Software Engineer

SUMMARY

Innovative and passionate Full Stack Developer with around 2 years of experience in designing, developing, and maintaining dynamic web and mobile applications. Skilled in front-end and back-end technologies including React.js, Angular, Node.js, Express.js, Spring Boot, and Java. Proficient in writing clean, efficient code using JavaScript (ES6+), Python, and modern languages. Experienced in integrating RESTful APIs, working with databases, and collaborating with cross-functional teams to deliver scalable, user-friendly solutions.

TECHNICAL SKILLS

- **Programming Language** - Java , python , JavaScript , HTML , CSS
- **Framework** - Angular , React , Express.js , Sprint Boot , Bootstrap
- **Mobile Application development** - Android Studio , React native
- **Database** - MySQL , PostgreSQL , Mongo DB
- **Other** - GitHub, GitLab, Micro services, Azure, Agile, Scram, Linux, WordPress, CI/CD, Figma

PROFESSIONAL EXPERIENCE

Trainee software engineer - OXZON AI

Current working

Developed and maintained back-end services using Java and Spring Boot, ensuring high performance and responsiveness. Wrote clean, testable code following SOLID principles and design patterns. Collaborated with cross-functional teams in Agile environments, handling database design, query optimization, and data migrations.

Intern Software Engineer - Sutra Technologies

Aug 2021 - Aug 2022

Contributed to web-based and mobile-based projects, honing skills in both front-end and back-end development. Utilized technologies such as React, React Native, Java, REST API, SQL, version control, and project management methodologies.

Sri Lanka GPS Solutions Project and Employee Management system project

- Developed user interfaces using React and React-Native and Implemented state management with Redux.
- Integrated frontend components with backend services via API calls.
- Wrote unit tests and performed UI testing to ensure functionality

EDUCATION

University of Westminster

Informatics Institute of Technology, Sri Lanka affiliated with the University of Westminster, London.

Bachelor of Engineering (BEng) (Hons) in Software Engineering with Industrial Placement
Second-Class Honors

Central College Kuliyaipitiya.

G.C.E Ordinary Level in 2015.

G.C.E Advanced Level in Science stream in 2019.

CERTIFICATIONS

- **Edxscope (2021)** - Advanced Python, Machine Learning Course.
- **Hacker Rank Certificates (2021)**- Python Basic, Angular Basic, Rest API Intermediate certificates.
- **ShapeAI (2021)**- JavaScript, ReactJS

PROJECTS

- **JudicialAI -2023**

This is my final year project. Through this project, I developed an automated system using a deep learning algorithm to predict final judgments in Sri Lankan legal cases. Also, users are able to access relevant information and necessary instructions in both Sinhala and English languages.

Technologies: Reactjs, Bootstrap, python (Machine learning), Firebase database, Github.

- **Premier League Manager System-2023**

This Application simulates the management of a premier league championship. The system helps users to manage teams, Organise matches, identify winners and keep records of matches and scores. The application has a command line interface and a web interface.

Technologies: Java, Angular, Sprint Boot, HTML, CSS and javascript.

- **E-commerce Application -2024**

This application is a full-featured e-commerce platform that allows users to browse products, add them to a shopping cart, and complete purchases. It includes secure user authentication for login and registration.

Technologies: React, Node.js with Express, MongoDB, JWT, RESTful APIs, HTML, CSS, and Bootstrap.

- **Water Quality Measuring Device -2022**

Through this project, monitoring water quality and water level using an IoT device. The data captured by the IoT device is used for water quality analysis and predicting water levels. The results are then sent to registered users' mobile phones via text messages whenever they need it. To provide this service used Dialog idea mart SMS service.

Technologies: C++, React, Python, Django, Heroku, and GitHub.

- **Interactive Quiz Platform -2023**

A technical Q&A site is designed to provide a platform for users to ask and get answers to their technical queries covering a variety of topics from fellow community members. This dynamic site aims to promote collaborative learning and knowledge sharing.

Technologies: PHP CodeIgniter, Bootstrap, and BackboneJs.

CURRICULAR ACTIVITIES

- Participated in Maths & Logic Hackathon 2021 in collaboration with UOW.
- Participated in Parallax 2021 web design and development hackathon.
- Organizing Committee web team Cutting Edge exhibition in IIT 2022
- Member of IEEE and AIESEC Student Branch – IIT.
