SUMMARY

Results-driven and highly motivated **Software Engineer with over 2 years of professional experience** as a Software Engineer and Associate Engineer, complemented by **1 year of hands-on internship experience**. Strong foundation in programming, software development, and problem-solving. Passionate about continuous learning and growth, with a keen interest in building scalable, efficient, and innovative software solutions. Eager to contribute technical expertise and dedication to high-impact projects while expanding my skills and advancing my career in software engineering.

EDUCATION

Bachelor's Degree in Computer Science

University of Westminster

📅 2019-2023 📍 IIT – Sri Lanka 🏆 First Class Honors

EXPERIENCE

Software Engineer

Epic Lanka (PVT) Limited

📅 2024-present 📍 Sri Lanka

Currently contributing to the backend development of a branchless banking solution for a leading Sri Lankan bank, aimed at expanding and enhancing the agent banking concept. Leveraging **Java 17, Spring Boot 3, Oracle database, and microservices architecture** to deliver scalable, secure, and high-performance financial services.

Contributed to the development of digital banking solutions for top-tier banks in Sri Lanka, designing and implementing backend services to support transactional and application-level workflows. Employed **Java 17, Spring Boot 3, Oracle, and a microservices-based architecture** to ensure system scalability, performance, and security.

Led and worked on the backend development of an eKYC Customer Onboarding Management System for a leading bank in Sri Lanka, using **Java 17, Spring Boot 3, and Oracle SQL**. Responsible for designing and implementing secure, scalable APIs and integrating identity verification workflows to streamline the customer onboarding process.

Managed and mentored software engineering interns, providing technical guidance, code reviews, and support to help them successfully contribute to project deliverables and grow their professional skills.

Additionally **participated in application go-live sessions**, actively supporting deployments and **resolving live issues** through debugging and analysis. Contributed to performance enhancements by **optimizing backend processes** and improving system efficiency.

Associate Software Engineer

Epic Lanka (PVT) Limited

📅 2023-2024 📍 Sri Lanka

Worked on the backend of the admin component of an online banking solution for a leading bank in Sri Lanka. Collaborated closely with cross-functional teams to integrate features and fulfill their technical requirements. Utilized **Java 8 and Spring Boot 2.6** to develop and maintain robust backend services.

Worked on the middleware of an online investment portal for a leading investment company in Sri Lanka. Utilized **Java 8, Spring Boot 2.6, and MySQL** to build a switch component, enabling efficient communication between the application and backend services.

Performed **bug fixes and maintenance** on existing applications to ensure stability, performance, and alignment with business requirements.

Software Engineer Trainee

Dialog Axiata (PVT) Limited

 2021-2022  Sri Lanka

Worked on full-stack development tasks for an internal billing system designed to generate customer reports by applying business rules and rate calculations. The system also included a client administration reports module. Utilized **Java 8, Spring Boot 2.3, MySQL**, and microservices architecture for development and deployment.

Handled bug fixing, Proof of Concept (POC) tasks, and conducted knowledge-sharing sessions to mentor and upskill teammates on technical concepts and best practices.
